

SHUBHAM KUMAR

B.Tech Computer Science · Data Science & AI

Delhi, India | [+91 73618 57543](tel:+917361857543) | yshubham0103@gmail.com | linkedin.com/in/shubham-kumar-288b7437b | github.com/shubham00011222 | [Portfolio](#)

SUMMARY

B.Tech CS student at NIT Delhi (2023–27) with hands-on experience in data analytics and performing data-driven analytics to generate actionable business insights. Proficient in Python, SQL, and Advanced MS Excel, with strong expertise in statistical techniques, data mining, and text mining. Adept at developing and maintaining dashboards to track key business metrics, evaluating business processes, and implementing solutions to increase business effectiveness. Seeking a Business Analyst or Data Analytics internship to support fact-based decision-making.

EDUCATION

National Institute of Technology Delhi (NIT Delhi)

Delhi, India | 2023 – 2027

B.Tech in Computer Science & Engineering

TECHNICAL SKILLS

Languages: Python, SQL

ML / DL: Scikit-learn, XGBoost, LightGBM, PyTorch, Keras, SHAP, EfficientNet

NLP & LLMs: HuggingFace Transformers, FinBERT, spaCy, NLTK

Data Stack: Pandas, NumPy, SQLite, Microsoft Excel

Visualisation: Streamlit, Plotly, Seaborn, Matplotlib, Power BI

MLOps & Deployment: Docker, FastAPI, PostgreSQL, Streamlit Cloud, HuggingFace Spaces, Vercel

PROJECTS

IPL Analytics (2008–2024) — End-to-End Cricket Analytics

[GitHub](#) [Live Demo](#)

Python · SQL (SQLite) · Pandas · Scikit-learn · Matplotlib · Seaborn · Streamlit

- Analysed 300K+ ball-by-ball IPL deliveries using 20+ SQL window function queries (CTEs, ROW_NUMBER, LAG) across batting, bowling, and team strategy. Built KMeans clustering to classify batsmen as Anchors vs Aggressors; logistic regression win-probability model (64.7% accuracy); 20 publication-quality visualisations including SHAP-style matchup heatmaps and phase-wise strike rate analysis. 8-page Streamlit dashboard with match simulator and rivalry deep-dive.

Telco Customer Churn Prediction Engine

[GitHub](#) [Live Demo](#)

Python · XGBoost · LightGBM · SHAP · FastAPI · Streamlit · Docker

- Trained XGBoost + LightGBM ensemble on IBM Telco Customer Churn dataset (7,043 real records); achieved ROC-AUC 0.717 with threshold-tuned recall of 64.2% on held-out test set. Applied SMOTE for class imbalance, SHAP TreeExplainer for per-customer reason codes, served via FastAPI (<50ms).

Retail Demand Forecasting System

[GitHub](#) [Live Demo](#)

Python · Prophet · LSTM · Keras · Streamlit · Docker

- Built Prophet + LSTM hybrid on Kaggle Store Sales dataset (2.6M rows, 54 stores, 33 product families); reduced MAPE from 22% to 9% vs naive baseline using holiday and promotion regressors. Generated 30-day forecasts with 90% confidence intervals across 1,200 SKUs.

Real-Time Sales Analytics Dashboard

[GitHub](#) [Live Demo](#)

Python · PostgreSQL · FastAPI · Streamlit · Docker · Prophet · ARIMA

- Engineered a live data pipeline and PostgreSQL data warehouse to process 500K+ historical and continuous sales records. Built an interactive Streamlit dashboard for real-time tracking of key business metrics. Applied statistical techniques (Prophet, ARIMA) for robust sales forecasting to drive fact-based decision-making.

Stock Portfolio Analytics Dashboard

[GitHub](#) [Live Demo](#)

Python · Streamlit · Pandas · Yahoo Finance API · Plotly

- Developed an interactive analytics platform for multi-asset portfolios, offering real-time performance tracking, drawdown analysis, and factor beta regressions using historical market data.
