

SHUBHAM KUMAR

B.Tech Computer Science · Data Science & AI

Delhi, India | [+91 73618 57543](tel:917361857543) | yshubham0103@gmail.com | linkedin.com/in/shubham-kumar-288b7437b | github.com/shubham00011222 | [Portfolio](#)

SUMMARY

Computer Science Engineering student (B.Tech) with a strong foundation in building end-to-end analytical pipelines, from raw data extraction (SQL, Pandas) to enterprise reporting (Power BI). Proven ability to design and deploy scalable data products and automated NLP solutions. Passionate about translating complex, messy datasets into clear, actionable business insights for the healthcare and life sciences sectors.

EDUCATION

National Institute of Technology Delhi (NIT Delhi)

Delhi, India | 2023 – 2027

B.Tech in Computer Science & Engineering

TECHNICAL SKILLS

Languages: Python, SQL

Data Stack: Pandas, NumPy, Microsoft Excel

Visualisation: Power BI, Plotly, Seaborn, Matplotlib

ML / DL: Scikit-learn, XGBoost, LightGBM, PyTorch, Keras, SHAP, EfficientNet

NLP & LLMs: HuggingFace Transformers, FinBERT, spaCy, NLTK

MLOps & Deployment: Docker, FastAPI, PostgreSQL, Streamlit Cloud, HuggingFace Spaces, Vercel

PROJECTS

Medical Image Classifier — Chest X-Ray Diagnosis

[GitHub](#) [Live Demo](#)

Python · PyTorch · EfficientNet-B4 · Grad-CAM · FastAPI · Streamlit

- Conducted exploratory data analysis (EDA) and data cleaning on the NIH ChestX-ray14 dataset (112K images) using Pandas and NumPy to handle labeling inconsistencies and class imbalances. Fine-tuned EfficientNet-B4 (91.2% accuracy) and applied Grad-CAM to extract visual, easily interpretable insights for medical diagnostics.

Real-Time Sales Analytics Dashboard

[GitHub](#) [Live Demo](#)

Python · FastAPI · PostgreSQL · Streamlit · Prophet · Plotly · Docker

- Wrote custom SQL queries to clean, transform, and load transaction data into a PostgreSQL database. Built an automated data pipeline and Streamlit dashboard to visualize exploratory data analysis, KPIs, and Prophet-based 30-day forecasts.

ResumeRank AI — Resume Screening & Candidate Ranking

[GitHub](#) [Live Demo](#)

Python · BERT (all-MiniLM-L6-v2) · TF-IDF · spaCy NER · NLTK · Streamlit · Docker

- Engineered a robust data extraction and text-cleaning pipeline using Python to parse highly unstructured data from various PDF/DOCX formats. Developed an NLP-based ranking system (BERT + TF-IDF) to systematically evaluate profiles, deploying the solution via Docker for easy team access and adaptation.

Customer Churn Prediction

[GitHub](#) [Live Demo](#)

Python · XGBoost · LightGBM · SHAP · FastAPI · Streamlit · Docker

- Performed rigorous data cleaning, filtering, and feature engineering using Python (Pandas/NumPy) on raw tabular data to identify key churn indicators. Trained an XGBoost/LightGBM ensemble (AUC 0.94) and leveraged SHAP to translate complex model outputs into clear business insights.

Retail Demand Forecasting System

[GitHub](#) [Live Demo](#)

Python · Prophet · LSTM · Keras · Streamlit · Docker

- Conducted extensive exploratory data analysis (EDA) on raw retail datasets to identify and engineer key demand drivers, such as holidays and promotions. Developed and monitored a hybrid forecasting model (Prophet + LSTM), reducing error margins from 22% to 9% while generating highly reliable 30-day forecasts.
